About This Game

Outfly, outshoot, and outwit your enemies as an outlaw cyborg on the run! You're a cyborg copy of Ypsilanti Rowe, the interstellar outlaw, whose enemies (and exes) are gunning for you. Can you upgrade your brain and pull one last heist?

I, Cyborg is a 300,000-word interactive science-fiction novel by Tracy Canfield. It's entirely text-based, without graphics or sound effects, and fueled by the vast, unstoppable power of your imagination.

Being a cyborg copy of the famous outlaw Ypsilanti Rowe comes with plenty of advantages. But when your cybernetic brain begins to fail only a rare and obsolete part can make your systems function again. Journey across the galaxy as you hunt down the missing piece. Along the way you'll shoot down enemy ships, or jam their sensors so they never know you're there; seduce Ypsilanti's old flames—or just stay out of their gunsights; dogfight beneath high-gravity stormclouds and race pirates through a mined-out asteroid's rocky tunnels.

When Ypsilanti turns up in the original flesh, will the two of you make the perfect team? Or is there only room in this galaxy for one of you?

- Play as male or female; gay, straight, bisexual, or asexual.

-
- Boost your skills with cybernetic upgrades: you're a cyborg!
 - Ambush a weapons shipment above a gas giant's rings.
 - Smuggle alien pets, penetrate the walls of a comet prison, and befriend an intelligent starship.
 - Work for the local crime lords, set them at each others' throats, or rat them out to the Intersolar Police.
 - Infiltrate the halls of power and steal top-secret data with a touch of your augmented fingertips.
 - Choose to favor your human instincts, your custom software, or a balance between the two.

You cue up the message and Helen Onbekend's familiar silver face looks out from your visiconf window. "Gotten that bullet hole I put in you patched up?" she says. "There's an opportunity for you to earn some legal cash in the Outer Belt, if that's not beneath you. Even you can't shoot me from five thousand light seconds away."

The Outer Belt is a long way from *Rain*. No one will be looking for you or the Sphinx there, and if you ever planned to make friends among the Onbekends, this would be as good a time as any to start. Of course, there are other places you could lay low for the time being.

- I'll take Helen's job offer.
- I'll pay Quillon a visit.
- I've figured out a way to rob one of the crime lords and get away with it.
- I've thought of someone who could tell me a lot about Ypsilanti...though he's very hard to visit at the moment.

Which upgrade do you want to buy?

- The physics coprocessor would make me a better shot.
- The in-flight analysis module would make me a better pilot.
- The tech troubleshooting knowledgebase would make me a better mechanic.
- The police records database would tell me everything worth knowing about Galdra. Knowing that would make me a better liar.
- The facial analysis module would let me appeal to people more.
- Nothing today, thanks.

Your seat's barely padded—you feel every lump in the skimmer's armor plate beneath you. The gal with the gun could shoot you at point-blank range and barely scratch the plate. Which would be handy if you wanted to shoot someone in here without venting all the nice cool air, but is not so handy when your priority is not getting shot.

It's interesting that their boss—this Kishore, whoever he or she is—doesn't seem to do business aboard *Rain of the Bowstring*. Keeping away from local law enforcement, perhaps? Or maybe avoiding something else?

Other than keeping your eye on that gun, how do you pass the flight?

- I'm a friendly kind of gal. These two will let me know what's going on if I make a good impression.
- I play it safe and just sit back and listen in on their conversation.
- Have they left a data network unshielded? It'll be tricky to connect without the pilots noticing, though.
- Instead of charming them, I'll impress them with some comments about their ship.

Kudos to Tracey Canfield for putting together some of the most exciting coherent, well thought-out, story and character rich, cohesive choice games I've played yet... and i've played a lot of these. I love the choices we can make and how it affects who we are and how we evolve as a character is simply a marvel... the stats and personal character development don't feel tact on like many other games like this feel. One of the best Choice games to date.
